DETAILED ACTION

This office action is in response to applicant's request for continued examination filed December 26, 2006.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Brairton on January 23, 2007.

The application has been amended as follows:

CLAIMS

In claim 1, line 17 after "disposed in one" delete "part" and insert - -region--;
and in line 19 after "the other" delete "part" and insert- -region- - and after "through holes" insert - -that are completely empty--.

In claim 24, line 15 after "disposed in one" delete "part" and insert - -region--;
and in line 18 after "the other" delete "part" and insert - -region- - and after through holes" insert - -that are completely empty- -.

Allowable Subject Matter

Claims 1, 4, 5, 7-9, 11-17 and 24-30 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious a heat spreader connected to the non –active surface of the chip including a plurality of holes extending through the spreader from the outer surface to the inner surface with some of the holes including pins and the other holes completely empty and providing air convection including all the limitations of the independent claim.

In contrast, while inserting pins in holes in a heat dissipating member is known in the art as illustrated by (U.S. 6,075,699) as is the formation of an empty hole in a dissipating member for moisture release as illustrated by McShane et al (U.S. 5,105,259), when the features are combined in the prior art then the holes that contain no pins are no longer empty, but are used to further secure components of the package as in Maeda (JP 358176959).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art as illustrated in Li (U.S. 5,982,621) discloses an intermediate step with its heat spreader/sink with a plurality of holes.
